

Climate Benefits.

Each household that participates in the New Jersey CleanPower Choice ProgramSM can avoid up to 10,000 lbs. of CO₂ emissions per year, which is equivalent to planting 1.35 acres of trees!* This helps to preserve our climate and shoreline.

*This is an estimate based on 100% of usage and will vary by your product selection and household usage.

**It's a simple,
 easy way to
 choose clean
 power.**

New Jersey's Clean Energy ProgramTM is brought to you by the New Jersey Board of Public Utilities.

Help make a cleaner tomorrow.

Sign up today!

What is the New Jersey CleanPower Choice ProgramSM?

The **CleanPower** Choice Program from the New Jersey Board of Public Utilities (NJBPU) is a statewide program that allows you to choose clean renewable sources of energy. Wind power and small hydro power are available from three suppliers. **CleanPower**, that's good for the environment, good for the climate, and good for New Jersey. The clean electricity is generated by independent suppliers in New Jersey and the mid-Atlantic region, and is verified by the NJBPU on customers' behalf.

How it works – You'll still get the same reliable service from your current local utility. All that changes is that more renewable energy sources are used to meet New Jersey's needs. You still call your current electric company with inquiries about your regular electric service. If you ever want to leave the program, you can at any time; just call 1-866-NJSMART. Nothing has to be installed, and rest assured you'll still receive plenty of electricity.

What will it cost? Your cost will vary based on the **CleanPower** supplier you select and your usage – check your bill for your actual usage. For the average New Jersey home (750 kWh per month), the **CleanPower** Choice Program could cost an additional \$6.19 to \$15.00 per month, depending on which product you use. And you'll be contributing to the development of renewable sources of energy and the protection of our environment and shoreline. You'll still receive only one bill from your electric company and your **CleanPower** purchase will show as a separate line. Isn't that simple?

How do I sign up?

Follow the 3 steps on the form.

For more information, call **1-866-NJSMART**, or visit **NJCleanEnergy.com**.

Yes, I want to make the **CleanPower** Choice to cleaner energy! I understand a renewable energy charge will be added to my monthly electric bill.

1

Below are your **CleanPower** supplier options. Read through them and see which one works best for you. Be sure to indicate your selection by placing a check in the box next to one of the **CleanPower** suppliers.

Company (check one box only)	Resource	Price per Kilowatt Hour	Percent of Monthly Electricity Usage	Average Additional Monthly Cost (avg. home = 750 kWh/mo.)
<input type="checkbox"/> Sterling Planet, Inc. www.sterlingplanet.com/state/New_Jersey/	67% Wind 33% Small Hydro	3.5¢	25%	\$6.56
<input type="checkbox"/> Green Mountain Energy Company www.greenmountainenergy.com	50% Wind 50% Small Hydro	2.0¢	100%	\$15.00
<input type="checkbox"/> Community Energy, Inc. www.newwindenergy.com	100% NJ Wind	5.5¢	15%	\$6.19
Please refer to CleanPower Marketer websites for additional products.				

New Jersey **CleanPower** Choice Program charges are in addition to your normal monthly charges. Check your electric bill for your actual monthly usage to determine your cost. Currently, the average Atlantic City Electric residential customer pays **17¢** per kilowatt hour. For more information, visit www.NJCleanEnergy.com or call **1-866-NJSMART**.
