

Important Information for New Jersey Residential Customers

Effective October 1, 2008 Atlantic City Electric's rates have changed based on a schedule approved by the Board of Public Utilities (BPU). The monthly bill for a typical residential customer using 1000 kWh per month will go from \$159.11 to \$163.26 based on rates in place in May 2008. Your impact may vary based on usage. The adjustment in Basic Generation Service reflects higher market costs for the electricity the company buys on behalf of its customers, along with the elimination of a temporary one-time credit which helped to keep down costs during the hot summer months when demand for power and electric rates were higher. Atlantic City Electric does not profit from these charges. They are a straight pass through to the customer. Please visit atlanticcityelectric.com for more information about your rates.

Your Bills Are Prorated

Electric billings are based on rates designed for a 30 day billing period. Billings for other than 30 days are calculated to reflect the actual number of days in the billing period as follows:

Service Charge $\$2.48 \div 30 = \0.082700 per day

Distribution Charge First Block (Summer): $750 \text{ kWh} \div 30 = 25 \text{ kWh}$ per day

Distribution Charge First Block (Winter): $500 \text{ kWh} \div 30 = 16.667 \text{ kWh}$ per day
